

James Ryo Blockchain developer

✉ jamesryo310@gmail.com

📍 Singapore

Profile

Developer specializing in Flutter and front-end development, good at building cross-platform mobile applications and responsive web interfaces. Proficient in Flutter mobile development and Strong experience with modern front-end technologies such as Vue.js and React.js. Known for providing a seamless user experience and scalable, clean code. Passionate For building high-performance applications using Flutter's flexibility and front-end frameworks.

Education

Bachelor of Computer Science, Stansfield College

2013 – 2017 | Singapore, Singapore

Professional Experience

Product Manager, Voyage

2022 – 2024 | Los Angeles, USA

As a product manager at Voyage, a World Tourism Development Platform, I led the development and management of mobile and web products aimed at enhancing the global tourism experience. I coordinated with cross-functional teams, driving product strategy from concept to launch, ensuring alignment with market demands and customer needs. My focus was on delivering seamless user experiences and leveraging the latest technologies to achieve product innovation.

Key Responsibilities:

- Spearheaded the development and release of mobile and web applications, optimizing for user engagement and customer satisfaction.
- Managed product roadmaps, feature prioritization, and release cycles, ensuring timely delivery and quality control.
- Collaborated with design, engineering, and marketing teams to create user-centric products that align with business goals.
- Analyzed market trends, customer feedback, and competitor products to continuously improve and adapt the product strategy.
- Implemented agile methodologies to streamline development processes and foster collaboration across teams.

Blockchain Developer, HeySummit

2020 – 2022 | Edinburgh, Scotland

As a blockchain developer at HeySummit, I was responsible for designing, developing, and deploying blockchain solutions, focusing on smart contracts, NFTs, and decentralized applications (dApps). I worked closely with cross-functional teams to deliver secure and scalable blockchain-based features for various platforms. My contributions helped enhance user engagement and broaden the platform's use of decentralized technologies.

Key Responsibilities:

- Developed and deployed **smart contracts** on Ethereum and other blockchains using **Solidity**.
- Built and maintained **NFT marketplaces** and integrated decentralized financial (DeFi) protocols.
- Collaborated on the creation of **decentralized governance models (DAOs)** for community-led
- Led the front-end integration of blockchain solutions with **React.js** and back-end systems using **Go**.
- Ensured security and compliance through **smart contract audits** and rigorous testing.
- Contributed to the development of **tokenomics** for platform growth and user engagement.

Fullstack Developer, REVOLVE HEALTHCARE

2018 – 2020 | Warsaw, Poland

During my time at REVOLVE HEALTHCARE, I worked as a full-stack developer, contributing to the design, development, and deployment of healthcare software solutions. I developed both front-end and back-end systems, ensuring seamless integration and data flow. My work focused on building responsive web applications with a user-friendly interface and robust server-side functionality.

Key Responsibilities:

- Developed healthcare management applications using **JavaScript (React.js, Node.js)** and **Python (Django)**.
- Collaborated with UI/UX teams to create intuitive, responsive interfaces for end-users.
- Implemented RESTful APIs to facilitate communication between front-end and back-end systems.
- Managed databases with **MySQL** and **MongoDB**, ensuring data security and privacy compliance.
- Optimized application performance and maintained code quality through **automated testing** and continuous integration.
- Provided technical support and maintenance, addressing issues and implementing feature enhancements.
